

I am a subscriber of XM radio and I am offended that you and /or your origination are attempting to regulate what I have paid a subsctiption fee to listen to. I travel regulary and, thanks to XM's programming I can hit a pre-set and know that I will have accurate weather info while traveling in my boat, motorcycle, car or while at home in my police cruiser. I have paid for this information so unless you are prepaired to reimberse subscribers for what we have paid for, please keep your fingers out of subscribtion radio programming.

J. E. Geib
